

Dir-RNN
 σ_{xx} [MPa]

This figure shows the σ_{xx} stress field from a Dir-RNN simulation. The color scale is identical to the Abaqus plot, ranging from -167.647 MPa (dark blue) to 362.732 MPa (dark red). The plot shows a U-shaped component with a central circular hole and a semi-circular notch at the bottom. The stress is highest at the notch and lowest at the top.

Mean: 1.089
Median: 0.745
Max.: 3.729
Min.: 0.018
