

Dir-RNN
 σ_{xx} [MPa]

This figure shows the σ_{xx} stress field from a Dir-RNN simulation. The color scale is identical to the Abaqus plot, ranging from -171.062 MPa (dark blue) to 359.681 MPa (dark red). The stress distribution is very similar to the Abaqus result, capturing the main features of the stress field around the hole and notch.

Mean: 0.841
Median: 0.752
Max.: 4.266
